

DiskOnChip[®] Product Adapters

Overview

M-Systems offers a number of adapters for design and production purposes that increases the ease of integration and flexibility of the DiskOnChip products. Below you will find information on the DiskOnChip evaluation boards, which are small sized ISA cards with a socket for 32-pin DiskOnChip 2000, DiskOnChip Millennium or DiskOnChip DIMM2000 products. This is a useful tool for designers who need to evaluate, program and test the DiskOnChip products, even before the target platform is available. In addition, there is a GANG adapter for the incorporation of the DiskOnChip Millennium TSOP.

DiskOnChip TSOP II, DiskOnChip DIP and DiskOnChip DIMM2000 Evaluation Boards (EVB)

M-Systems' DiskOnChip EVB's are available for the whole DiskOnChip product family. These adapters provide a convenient evaluation and testing tools in a standard ISA Bus environment.

**DiskOnChip Millennium
TSOP II**

**DiskOnChip DIP
2000 & Millennium**

DiskOnChip DIMM2000

DiskOnChip GANG Adapter

The DiskOnChip Millennium TSOP-II ZIF adapter interfaces directly with M-Systems GANG programmer. Up to eight Millennium adapters can be attached to the GANG for duplication. The adapters can also be used in any DiskOnChip 32-pin socket.

DiskOnChip Millennium TSOP-II ZIF Adapter
